Team Contributions: Final
Sandlot

Team 29
Nicholas Fabugais-Inaba
Casra Ghazanfari
Alex Verity
Jung Woo Lee

This document summarizes the contributions of each team member for the final demonstration and documentation. The time period of interest is the time between Rev 0 and the Final documentation.

1 Team Meeting Attendance

[For each team member how many team meetings have they attended over the time period of interest. This number should be determined from the meeting issues in the team's repo. The first entry in the table should be the total number of team meetings held by the team. —SS]

Student	**Meetings**
Total	2
Nicholas Fabugais-Inaba	2
Casra Ghazanfari	2
Alex Verity	2
Jung Woo Lee	2

There were much more than 2 team meetings conducted during this time period, many of which were very informal and were not recorded using an issue in the repo. This was a due to a combination of time crunch and the informal nature of these team meetings. However, these team meetings were almost always attended by everyone on the team in some capacity. For example, maybe someone couldn't stay the entire duration of the meeting but was still able to contribute their piece and get the gist of the important information from the other team members.

[If needed, an explanation for the counts can be provided here. —SS]

2 Supervisor/Stakeholder Meeting Attendance

[For each team member how many supervisor/stakeholder team meetings have they attended over the time period of interest. This number should be determined from the supervisor meeting issues in the team's repo. The first entry in the table should be the total number of supervisor and team meetings held by the team. If there is no supervisor, there will usually be meetings with stakeholders (potential users) that can serve a similar purpose. —SS]

Student	Meetings
Total	3
Nicholas Fabugais-Inaba	2
Casra Ghazanfari	2
Alex Verity	3
Jung Woo Lee	3

[If needed, an explanation for the counts can be provided here. —SS]

3 Lecture Attendance

[For each team member how many lectures have they attended over the time period of interest. This number should be determined from the lecture issues in the team's repo. The first entry in the table should be the total number of lectures since the beginning of the term. —SS]

Student	Lectures
Total	1
Nicholas Fabugais-Inaba	0
Casra Ghazanfari	0
Alex Verity	0
Jung Woo Lee	1

[If needed, an explanation for the lecture attendance can be provided here. —SS]

4 TA Document Discussion Attendance

[For each team member how many of the informal document discussion meetings with the TA were attended over the time period of interest. —SS]

Student	Lectures
Total	1
Nicholas Fabugais-Inaba	1
Casra Ghazanfari	1
Alex Verity	1
Jung Woo Lee	1

[If needed, an explanation for the attendance can be provided here. —SS]

5 Commits

[For each team member how many commits to the main branch have been made over the time period of interest. The total is the total number of commits for the entire team since the beginning of the term. The percentage is the percentage of the total commits made by each team member. —SS]

Student	Commits	Percent
Total	1194	100%
Nicholas Fabugais-Inaba	111	9.29%
Casra Ghazanfari	116	9.71%
Alex Verity	157	13.14%
Jung Woo Lee	95	7.95%

[If needed, an explanation for the counts can be provided here. For instance, if a team member has more commits to unmerged branches, these numbers can be provided here. If multiple people contribute to a commit, git allows for multi-author commits. —SS]

6 Issue Tracker

[For each team member how many issues have they authored (including open and closed issues (O+C)) and how many have they been assigned (only counting closed issues (C only)) over the time period of interest. —SS]

Student	Authored (O+C)	Assigned (C only)
Nicholas Fabugais-Inaba	Num	Num
Casra Ghazanfari	Num	Num
Alex Verity	Num	Num
Jung Woo Lee	Num	Num

[If needed, an explanation for the counts can be provided here. —SS]

[If your team has additional metrics of productivity, please feel free to add them to this report. —SS]
